

Look Better & Feel Better from the Inside out!

Health at the cellular level!

The AO Scan Digital Body Analyzer represents the foremost advanced cutting-edge Nonlinear Systems (NLS) Technology of spectral analysis of the human body.

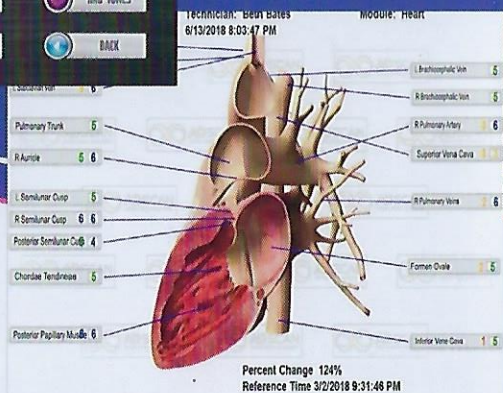

This Comprehensive Scanner is dual functioning with the capability to detect abnormalities in various cells, tissues and organs throughout the body. It detects frequencies and compares them to a database of healthy frequencies; determining if the cells are in an optimal or critical state. It then emits corrective frequencies back into the body allowing it to correct and update.

Frequency Optimization Page 1

The AO Scan Process

Is a non-invasive complete body scan that quickly evaluates the entire body's electromagnetic energy field detecting illness and unwanted organisms.

The AO software then analyzes these algorithms and compares them to an extensive database. The results are graphically displayed to show areas of optimal health and areas with too low or too high energy.

Customized frequencies are produced to normalize each part of your body where optimization is needed.
